

Step 1 : start

Step 2: already we have arrays of name,age, roll, subject, city

Step 3: if(name[] [0] == "A" || age >=10 && <=20)

Print(name)

Else:

Print (no names start with a and no students are not more than 10 years and less than 20 )

Step 1: Start

Step 2 : already we have array of three cities – array name = city, stu array is the name of students

Step 3: for (i = 0, i<city.length, i++)

If(i == delhi || i == Bangalore || i == Mumbai)

Print(stu.name)

Step 4 : stop
